

I am against Low Power FM taking precedence over the current FM translators because the station I listen to most of the time, K-Love, is a nationally broadcast station. K-Love keeps my mood positive and I believe it touches many people in their everyday lives. K-Love gives me national and worldwide news in a positive and encouraging way. I really think the world is a better place because of K-Love and I would hate to live without it. I believe many more people will benefit from K-Love in the future if you don't stop it from being aired locally and nationally.
